The screenshot shows the Wiley research platform interface. A search bar at the top contains the text 'breast cancer'. Below the search bar, a dropdown menu is open, showing two options: 'Advanced Search' and 'Citation Search'. A red arrow points to the 'Advanced Search' option. The background shows search results for 'breast cancer' with 5,076 results. There are buttons for 'Access CO', 'SAVE SEARCH', and 'RSS'. Below the search results, there are tabs for 'Articles & Chapters (245,076)', 'Publications (1)', and 'Collections (991)'. At the bottom, there are links for 'Refine Search', 'Export Citation(s)', and 'Download PDF(s)'. The top right corner has a 'Login / Register' link.

Search Tips

检索技巧

You can use the Boolean operators AND (also + or &), OR and NOT (also -) within search fields. These operators must be entered in UPPERCASE to work.

可增添至七个检索框，每个检索框中可使用布尔运算符“AND, OR, NOT”进行连接；支持通配符

phrase.

Wildcards

Use a question mark (?) in a search term to represent a single character (*wom?n* finds women or woman). Use an asterisk (*) to represent zero or more characters. For example, *plant** finds all words with that root (plant, plants, & planting) while *an*mia* finds variants with one or more letters (anemia & anaemia). Wildcards CANNOT be used at the start of a search term (**tension*) or when searching for phrases in quotes ("tobacco

WOL检索技巧

通配符

使用问号(?)来表示单个字符: (wom?n = women or woman)

使用星号(*)表示零个或多个字符: plant*查找所有带有该词根的单词(plant, plants, planting), 而 an*mia查找带有一个或多个字母的变体(anemia & anaemia)。

通配符不能用于搜索词的开头(*tension)或在引号中搜索短语("tobacco smoke")时。

作者搜索

作者的名字可以是全名, 也可以是首字母缩写。将作者姓名放在引号中以查找特定的名称及其变体。例如, "John Smith"可以找到John Smith、John K Smith和John Colby-Smith的文章, 而"J Smith"可以找到J Smith、JR Smith、John Smith和Julie Smith的文章。

the global burden of cancer worldwide using the incidence and mortality produced by the cancer, with a focus on geographic variability in estimated 18.1 million new cancer cases (17.0 million for males and 1.1 million for females) and 9.6 million cancer deaths (9.5 million for males and 0.1 million for females) in 2018. In both sexes combined, lung cancer is the most common cause of cancer death (11.6% of the total cases) and the leading cause of cancer deaths, closely followed by female breast cancer (9.5%), colorectal cancer (6.1%) for incidence and colorectal and liver cancer (8.2%) for mortality. Lung cancer is the leading cause of cancer death among males, followed by prostate cancer (10.6%) and colorectal cancer (6.1%) for incidence and liver and stomach cancer (for incidence) and liver cancer (for mortality). Breast cancer is the most commonly diagnosed cancer and the leading cause of cancer death among females, followed by colorectal and lung cancer (for incidence), and lung cancer ranks fourth for both incidence and mortality. Prostate cancer is the leading cause of cancer death among males and the leading cause of cancer death, followed by colorectal and lung cancer (for incidence), and lung cancer ranks fourth for both incidence and mortality. In both sexes combined, lung cancer is the leading cause of cancer death, followed by colorectal and liver cancer (for incidence), and liver and stomach cancer (for mortality). In both sexes combined, lung cancer is the leading cause of cancer death, followed by colorectal and liver cancer (for incidence), and liver and stomach cancer (for mortality). It is important to note that the data are based on the associated social and life style factors. It is important to note that the data are based on the associated social and life style factors. Advanced Energy Materials, part of the prestigious Advanced portfolio, is your prime applied energy journal for research providing solutions to today's global energy challenges.

Your paper will make an impact in our journal which has been at the forefront of publishing research on all forms of energy harvesting, conversion and storage for more than a decade.

The Advanced portfolio from Wiley is a family of globally respected, high-impact journals that disseminates the best science from well-established and emerging researchers so they can fulfill their mission and maximize the reach of their scientific discoveries.

Global cancer statistics 2018: GLOBOCAN estimates of incidence and mortality worldwide for 36 cancers in 185 countries

Correction(s) for this article

Freddie Bray BSc, MSc, PhD, Jacques Ferlay ME, Isabelle Soerjomataram MD, MSc, PhD, Rebecca L Siegel MPH, Lindsey A. Torre MSPH, Ahmedin Jemal PhD, DVM

First published: 12 September 2018 | <https://doi.org/10.3322/caac.21492> | Citations: 22,213

DISCLOSURES: Lindsey A. Torre, Ahmedin Jemal, and Rebecca L. Siegel are employed by the American Cancer Society, which received a grant from Merck Inc for intramural research outside the submitted work; however, their salaries are solely funded through American Cancer Society funds. The remaining authors report no conflicts of interest.

Abstract

This article provides a status report on the global GLOBOCAN 2018 estimates of cancer incidence and mortality worldwide. The International Agency for Research on Cancer, which is part of the World Health Organization, estimates that there will be an estimated 20.3 million new cancer cases (17.7 million excluding nonmelanoma skin cancer) and 9.7 million deaths (8.5 million excluding nonmelanoma skin cancer) in 2018. In 2018, cancer is
